### PLEASE READ ALL INSTRUCTIONS BEFORE BEGINNING INSTALLATION

1. Wear proper eye protection and make sure area where Sportwing® will be installed is clean.
2. **See Diagram A below for placement of Sportwing®.** Leaving paper liner on bottom of mounting feet, center the Sportwing® left to right on vehicle and position the Sportwing® for installation. Using a grease pencil, outline both mounting feet (**NOTE: it is advisable to have someone hold the Sportwing® in place while you outline mounting feet**). After outlining, set Sportwing® aside.
3. **See Diagram B below for drilling instructions and fastening of Sportwing®.**
4. Next, peel the paper liner from the bottom of the mounting feet and place the Sportwing® back onto the outline marks made in Step #2. Press firmly into place.
5. Open hatch (**NOTE: prior to drilling, it is important to protect the installation area. Place a drop cloth on this area to prevent shavings from accumulating in drip well channel and bumper area**). Holding onto the Sportwing® while drilling and using a 5/32" drill bit, drill up into the bottom of the mounting feet using the same hole in hatch that you drilled in Step #3, holding Sportwing® in place while drilling (**NOTE: when drilling, you must use a drill stopper to prevent from drilling through the top of the Sportwing®. Only extend drill bit no more than 3/4" past drill stopper**). Using a ratchet with 5/16" socket, install mounting screws with lock washers and tighten. **DO NOT OVER TIGHTEN.**
6. Clean up any metal shavings that might have fallen into the trunk and you are done.
