- C) 3 – Flat Washers
- D) 1 – Allen Wrench (*use Allen Wrench in drill at slow speed to install screws in fastening holes of Sportwing®*)
- E) 2 – Templates (*one for drivers side, one for passenger side*)
- F) Adhesive Pads (*for an unpainted Sportwing®*)
- G) Instruction Sheet

PLEASE READ ALL INSTRUCTIONS BEFORE BEGINNING INSTALLATION

1. Wear proper eye protection and make sure area where Sportwing® will be installed is at room temperature, clean and free of wax.
2. Place the Sportwing® on rear hatch, **as shown in Diagram A below.**
3. Open hatch. On passenger side, notice two large circular cut out holes with black plugs under the area where the mounting feet sit. Remove black plugs. On drivers' side, notice there is only one hole for fastening Sportwing®. **See Diagram B on back of sheet for measurement.**
4. Starting on the passenger side, line up the template, provided, with the front edge of the hatch, **as shown on Diagram C on back of sheet.** Next, drill a 1/8" or similar size pilot hole through the two fastening spots on template. After drilling pilot holes, open hatch slightly and open the two pilot holes to 3/8" using a #1 uni-bit (**NOTE: we suggest using a uni-bit for a cleaner cut**). Repeat procedure on drivers' side. The only difference is that on the drivers side there is only one fastening hole. After all fastening screws are tightened, the Sportwing® will be solidly fastened to hatch.
5. Place the Sportwing® on hatch lid and using 3/4" screws, provided, with lock washers and flat washers, secure Sportwing® to vehicle using Allen Wrench, provided. **DO NOT OVER TIGHTEN.** Replace black factory plugs.
6. Clean up any metal shavings that may have fallen into the trunk and you are done. If you have any questions, problems or if you would like information about other quality Sportwing® products, please call the TOLL FREE number at the top of this sheet. Thank you for choosing Dawn Enterprises Inc.
