EFFECTIVE: 12/24/2019

INSTALLATION PACKAGE INCLUDES:

- A) 6 – M6 x 5/8" Screws
- B) 6 – Flat Washers
- C) 6 – Paper Hole Locators
- D) Instruction Sheet

EXTRA TOOLS NEEDED: Masking Tape, Tape Measurer, Electrical Tape, Drill, 1/8" Drill Bit, Uni-Bit**PLEASE READ ALL INSTRUCTIONS BEFORE BEGINNING INSTALLATION**

1. Start by removing trunk liner by unscrewing plugs and removing plugs with removal tool. Set aside. Lay blanket in trunk to collect metal shaving after drilling. Close trunk. Center the Sportwing® on deck lid from left to right. Attach the six (6) hole locators to the Sportwing® as shown in **Diagram A**. Place the Sportwing® back onto the decklid and tape the hole locators to the decklid. Next, remove the Sportwing®, leaving the hole locators attached to the decklid. We recommend tracing the outlines of the three (3) Sportwing® feet with a grease pencil to easily set your Sportwing® into the correct location for Step #3.
2. Using a 5/32" bit, drill through the top of the deck lid at each of the six (6) hole locator holes. After drilling, clean up any shavings on deck lid carefully. Once holes are drilled, apply touch-up paint (not included) to protect the bare metal from corrosion.
3. Next, remove the lining from the pads on the feet of the Sportwing® to expose the adhesive tape. Carefully center the Sportwing® onto the deck lid. Press down firmly to ensure proper adhesion to the deck lid. While holding the Sportwing® onto the deck lid (you may need another person to assist you). Proceed to install sheet metal screws with a Philips screwdriver into all six (6) Sportwing® holes until tightly fastened.
4. Clean up any metal shavings that might have fallen into the trunk and you are done. The installation should take no longer than 60 minutes. If you have any questions, problems or if you would like information about other quality Sportwing® products, please call the TOLL-FREE number at the top of this sheet. Thank you for choosing Dawn Enterprises Inc.
